"Really great new release la Banda Destruida! BRAVO!" - Mike Watt

"A classic '90s post-hardcore sound with an alternative rock and a mathy feeling that's not afraid to include everything they like, from Latin rhythms to even some synth sounds here and there." - diyconspiracy.net

Beer City would like to welcome **BANDA DESTRUIDA** to our roster. Coming all the way from Santiago, Chile. **BANDA DESTRUIDA** brings a whole lot to the table. Living and growing up in Chile **BANDA DESTRUIDA** has a unique perspective and influence on the music they create. They have an ingenious distinct heavy mix of hardcore/punk, alternative/math rock and even mix in some native Latin rhythms to sound very very unique. Yet their songs are quit powerful and urgent and make you want more. It's a blend like no others are doing , but its pulled off amazingly well.

Living in Chile you better believe they bring the countries condition and experiences of being Chilean into their music. From lyrics (which are all sung in their native Spanish) to music you get a good grasp of what its like there and a glimpse into the thoughts of the people. Also this record is bilingual. It features lyrics, credits and song titles in both English and Spanish.

In short defiantly buy this record cause if you dont you will be missing out on a very distinctive, good intense band.

- Praised by Mike Watt of **THE MINUTEMEN**
- Restored and remastered
- Also falls under the category of Latin music which there is a huge market for.
- Advertising campaign in print and online

Stores get it from 'Independent Label Distribution' or its partners.
